**Need a fast & intelligent way
to protect users anywhere
they access the internet even
without VPN?**

**Want to deal with attacks at
fingerprints & footprints level to
uncover their habits & destroy them?**

FROLGATE
TECHNOLOGY GROUP
Helping You Serve Your Customers Better

Better Together

But the problem doesn't end here.....

What if you could protect your branch offices without adding another appliance or deploying endpoint security?

What if you could identify and block threats earlier?

An agile security solution can...

Learn

Intelligence to uncover current and emerging threats

See

Visibility for activity across all devices and ports, anywhere

Block

Stop phishing, malware and ransomware earlier

A good security solution can be deployed in minutes, not months.

Blanket your security and boost performance

CISCO UMBRELLA

Other Security solutions

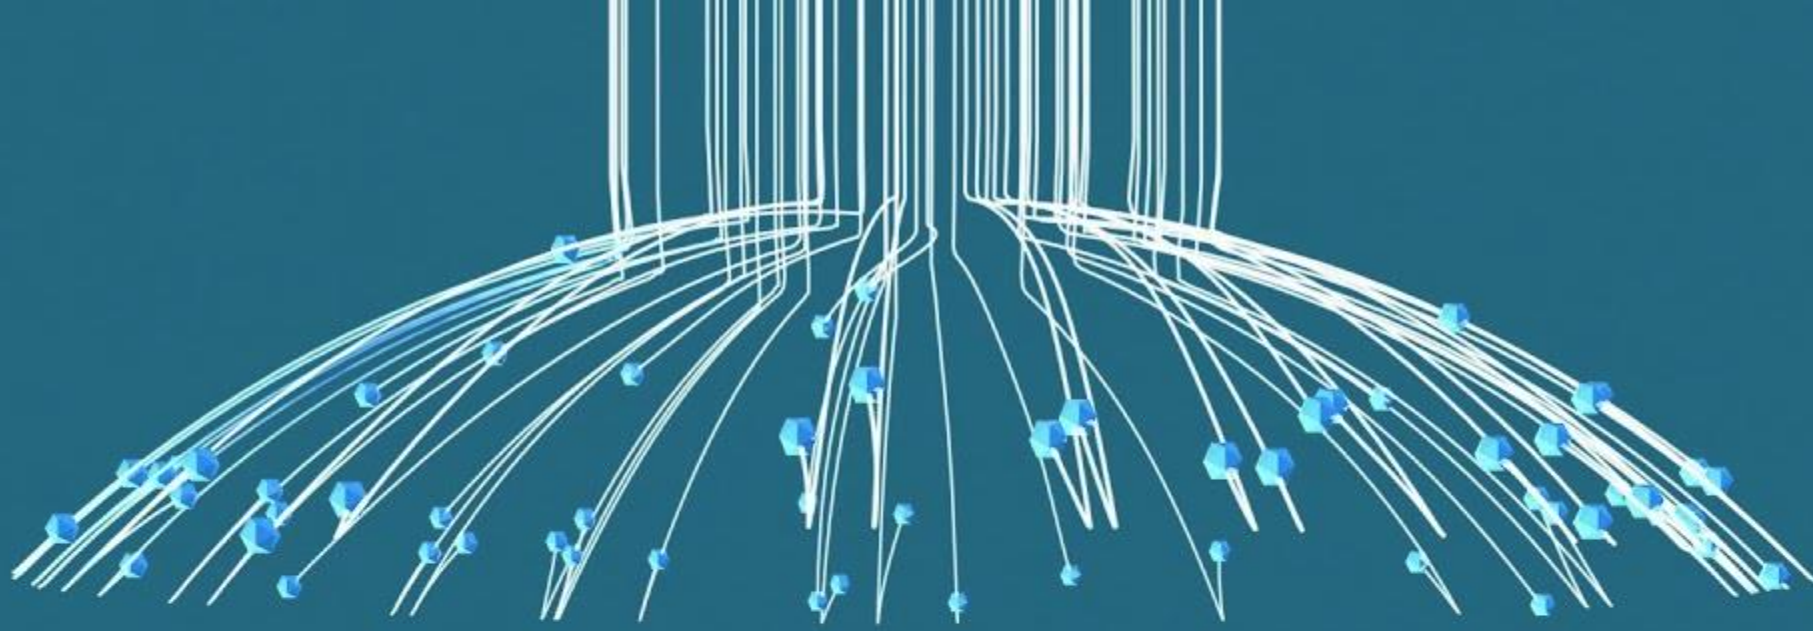

Provides the first line of defence against threats on the internet wherever users go.

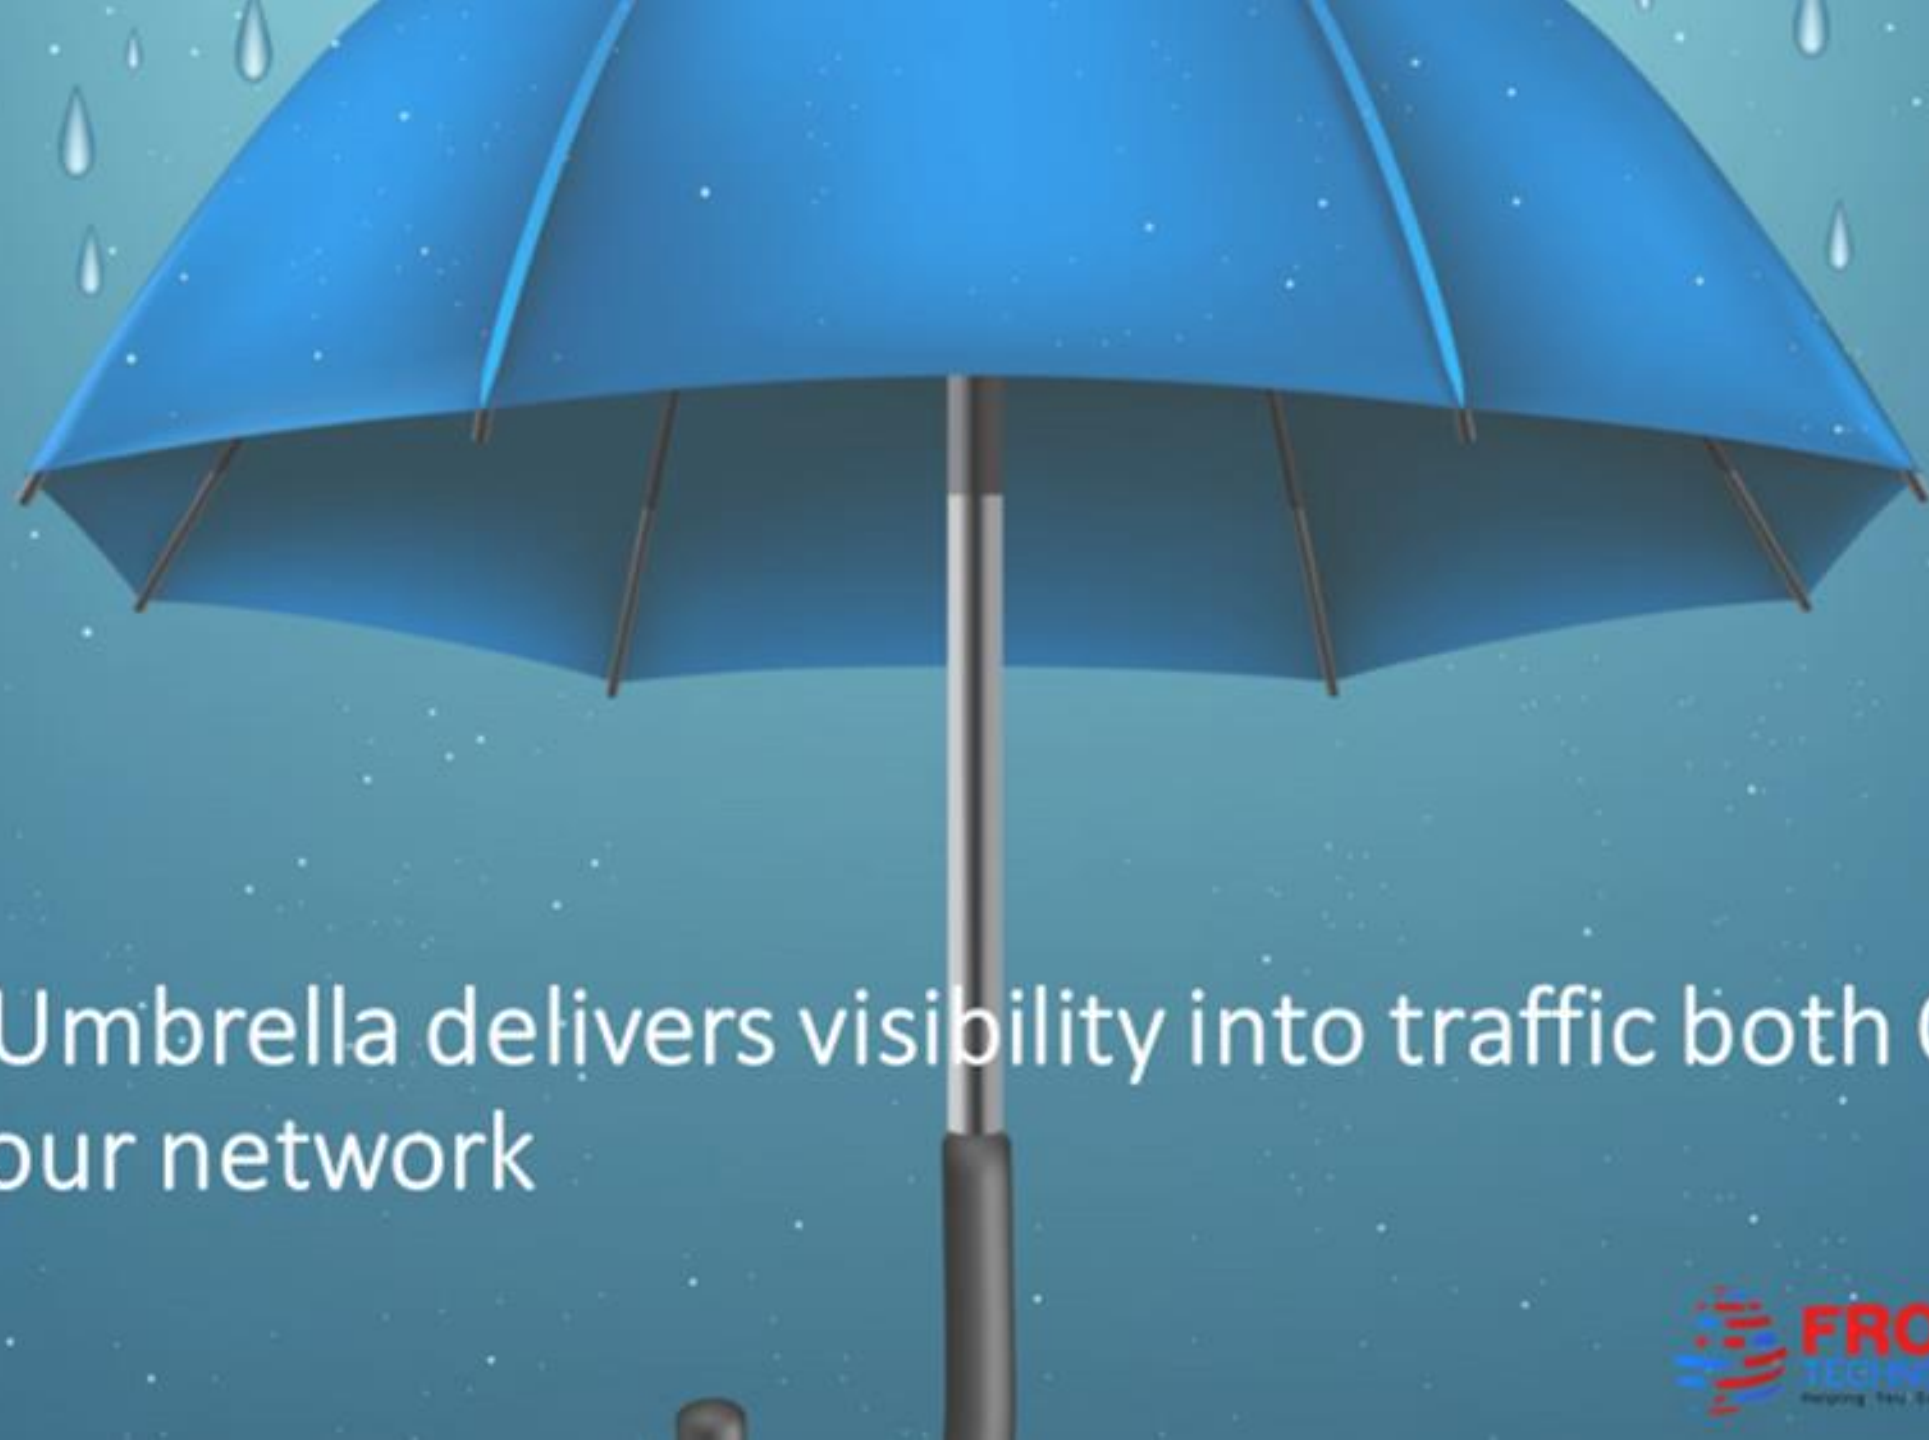

**We Are Here To Enable
and Empower You To
Achieve More With Less**

**Avoid the aftermath with a
before strategy**

Cisco Umbrella

uses the internet's infrastructure to block malicious destinations before a connection is ever established.

Cisco Umbrella delivers visibility into traffic both ON & OFF your network

Here's how:

DNS & IP layer enforcement

Umbrella uses DNS to stop threats over all ports and protocols – even direct-to-IP connections. Stop malware before it reaches your endpoints or network.

Intelligent proxy

Instead of proxying all web traffic, Umbrella routes requests to risky domains for deeper URL and file inspection. Effectively protect without delay or performance impact.

Command & control callback blocking

Even if devices become infected in other ways, Umbrella prevents connections to attacker's servers. Stop data exfiltration and execution of ransomware encryption.
